```

## Output:

### Login page(click register to enter into the portal)

### Register page:

The screenshot shows a web browser window with the URL `localhost/app/register.html`. The form is titled "Register Page" and contains the following sections:

- Name:** Fields for "first name" and "last name".
- Personal details:**
  - Age: A dropdown menu showing "20".
  - Date of birth: A date picker showing "18 / 06 / 2001".
  - Street name: "Gandhi nagar".
  - Village name: "mallanginar".
  - Pin code: "626109".
  - State: A dropdown menu showing "India".
- ID creation:** Fields for "userId" (containing "sudha232") and "password" (containing "1234").
- Image upload:** Two "Browse..." buttons for "img" and "sign".
- Table:** A table with columns "Name", "marks", and "cutoff".
 

Name	marks	cutoff
10th mak	0/500	0- 100 %
12th marks	0/600	0-100%
- Register button:** A red button at the bottom right.

After entered all the datas in all the field,

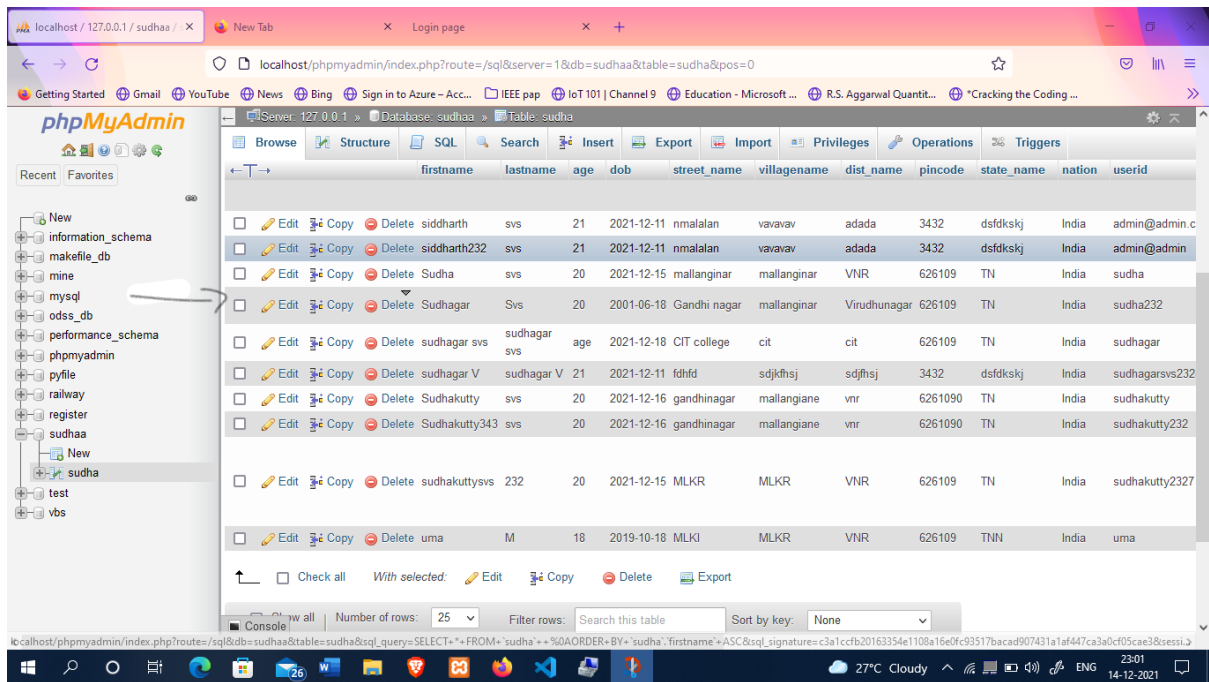

The screenshot shows the same "Register Page" form, but now with data entered in all fields:

- Name:** "Sudhagar" in "first name" and "Svs" in "last name".
- Personal details:**
  - Age: "20".
  - Date of birth: "18 / 06 / 2001".
  - Street name: "Gandhi nagar".
  - Village name: "mallanginar".
  - Pin code: "626109".
  - State: "India".
- ID creation:** "sudha232" in "userId" and "1234" in "password".
- Image upload:** The "img" button shows a file "Snapchat-649489505.jpg" and the "sign" button shows "Snapchat-29714544.jpg".
- Table:**

Name	marks	cutoff
10th mak	453	90
12th marks	988	83
- Register button:** A red button at the bottom right.

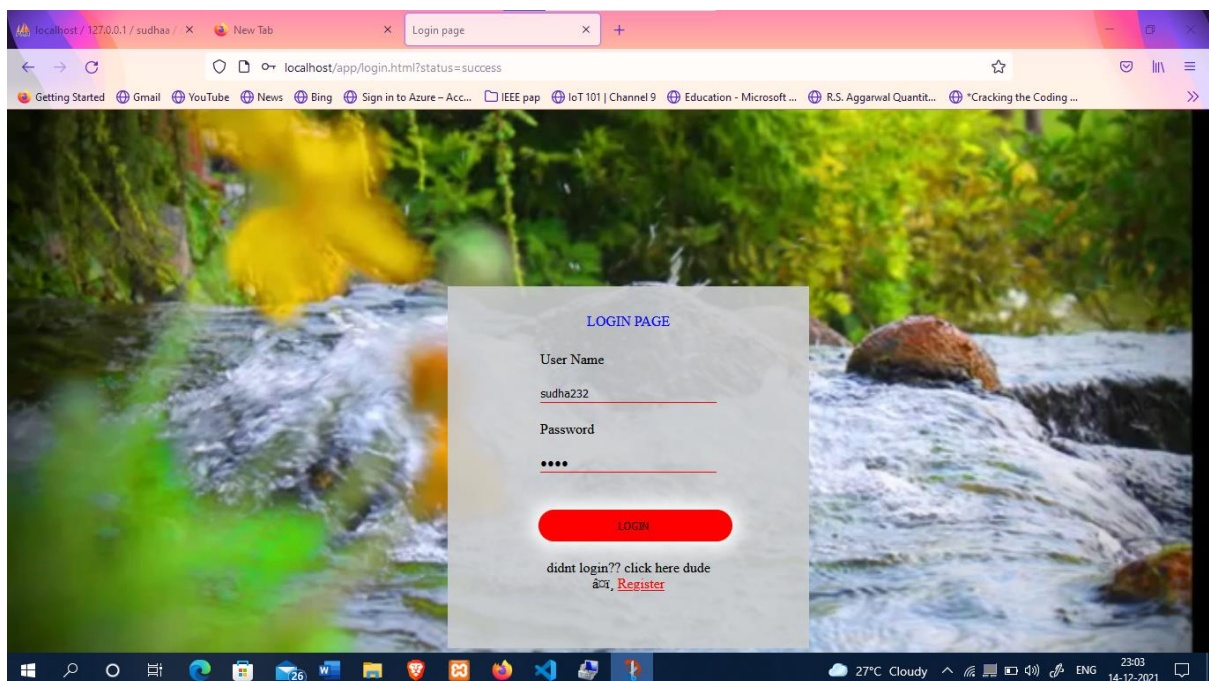

For signature image, have to add sign image.

After clicking the register button it will store all the data's to the database and register .html redirect to login page with parameter location success status.

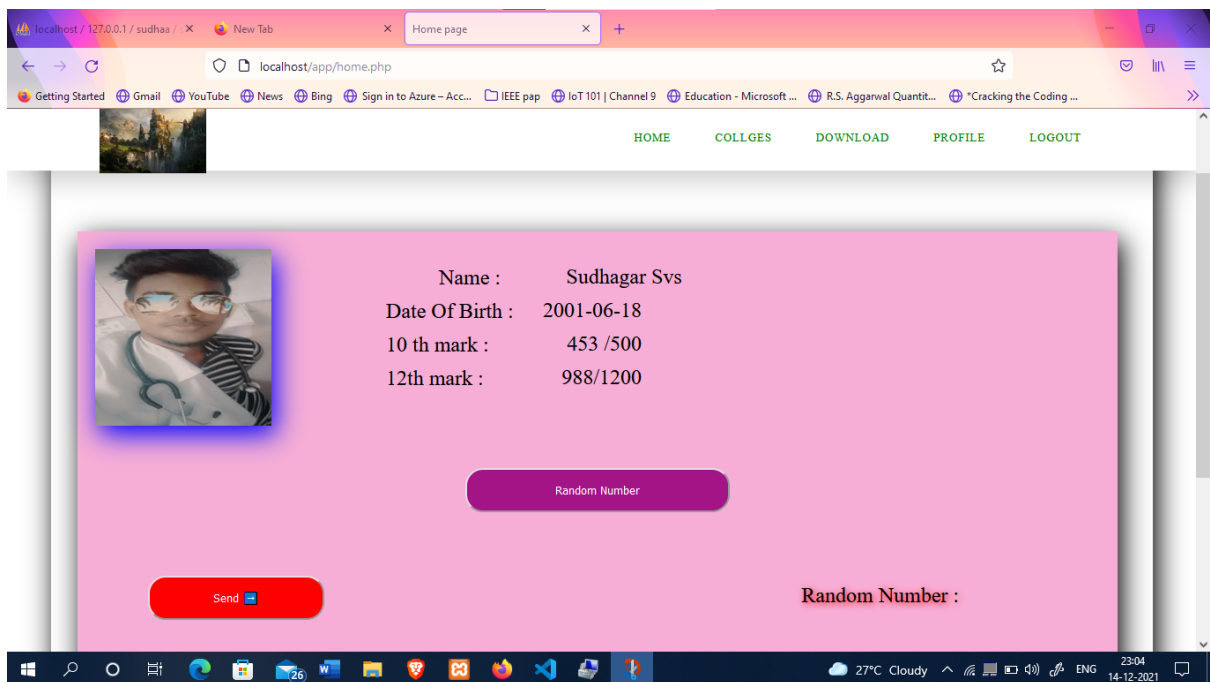

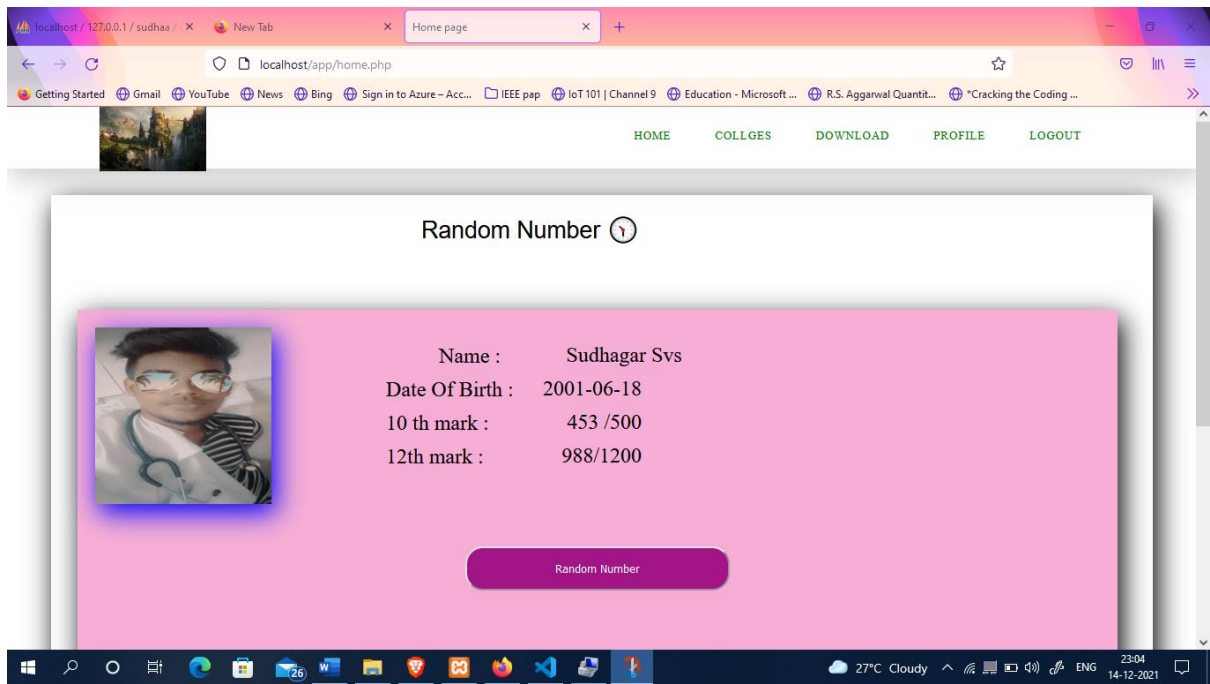

Out given data's have been stored on our database.

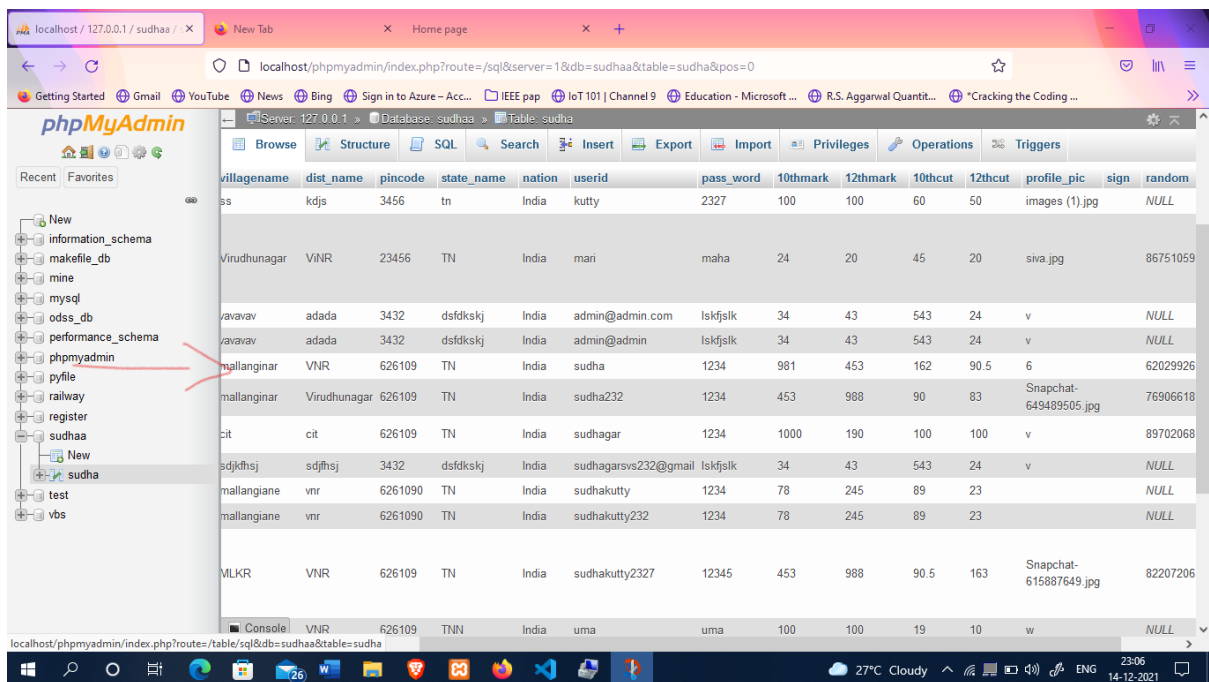

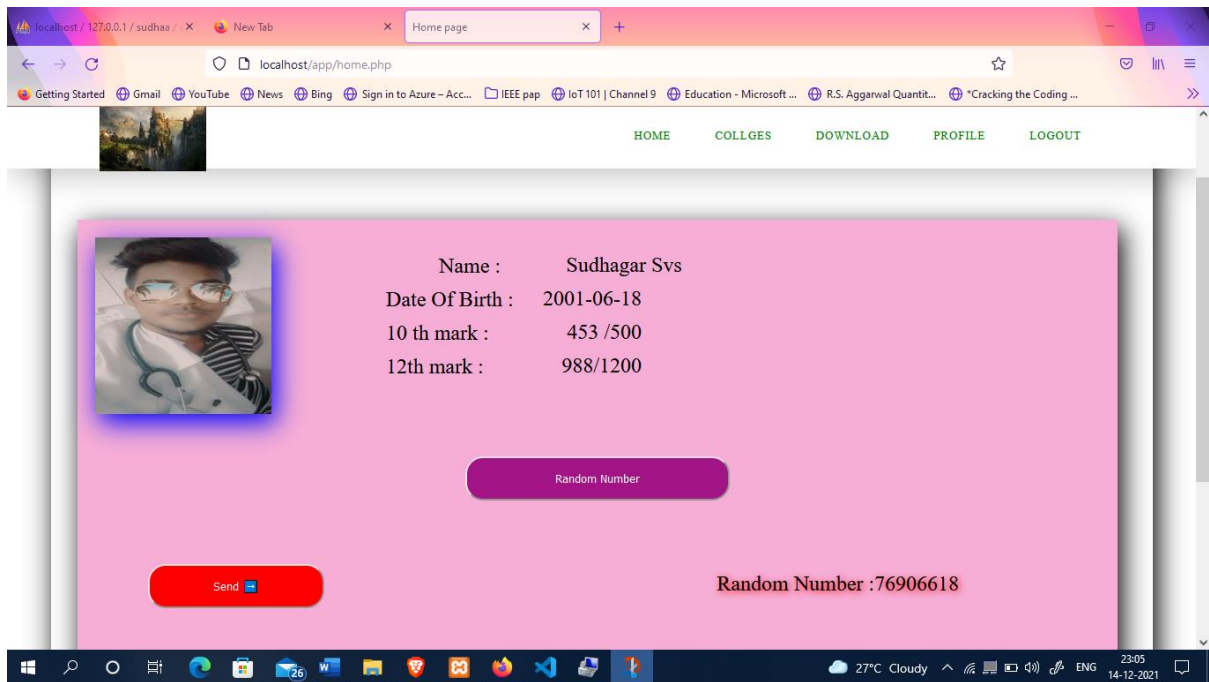

Now have to login ,

It would redirect to main page for random number generation.

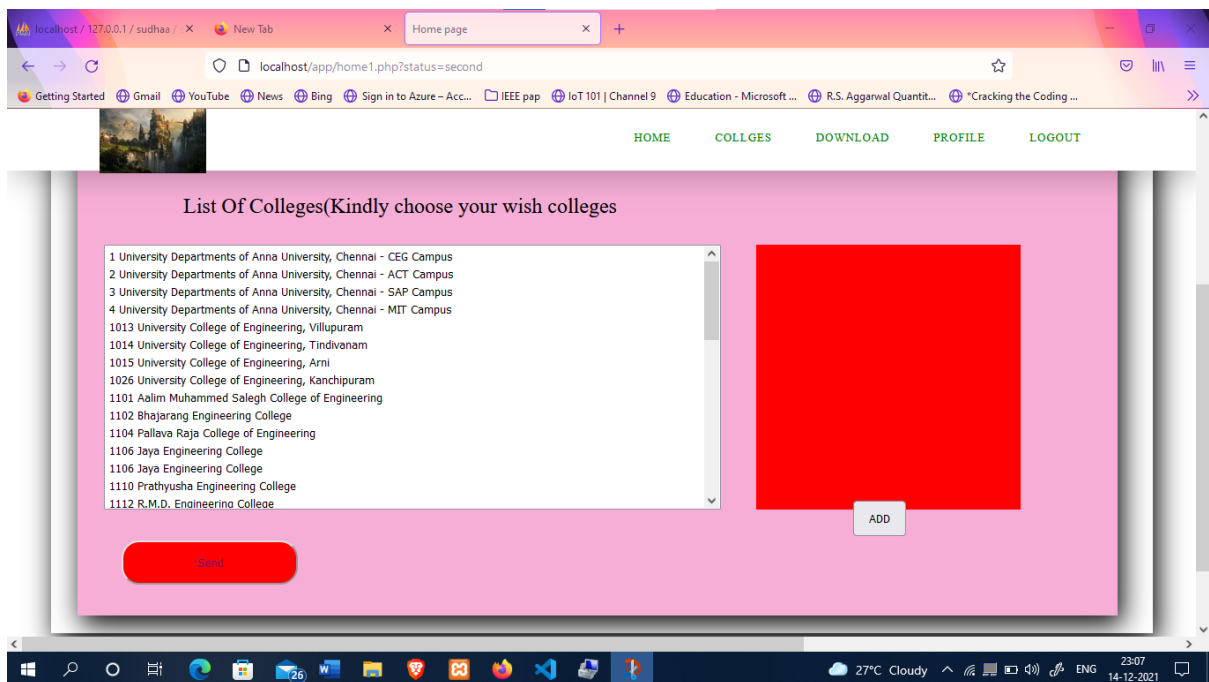

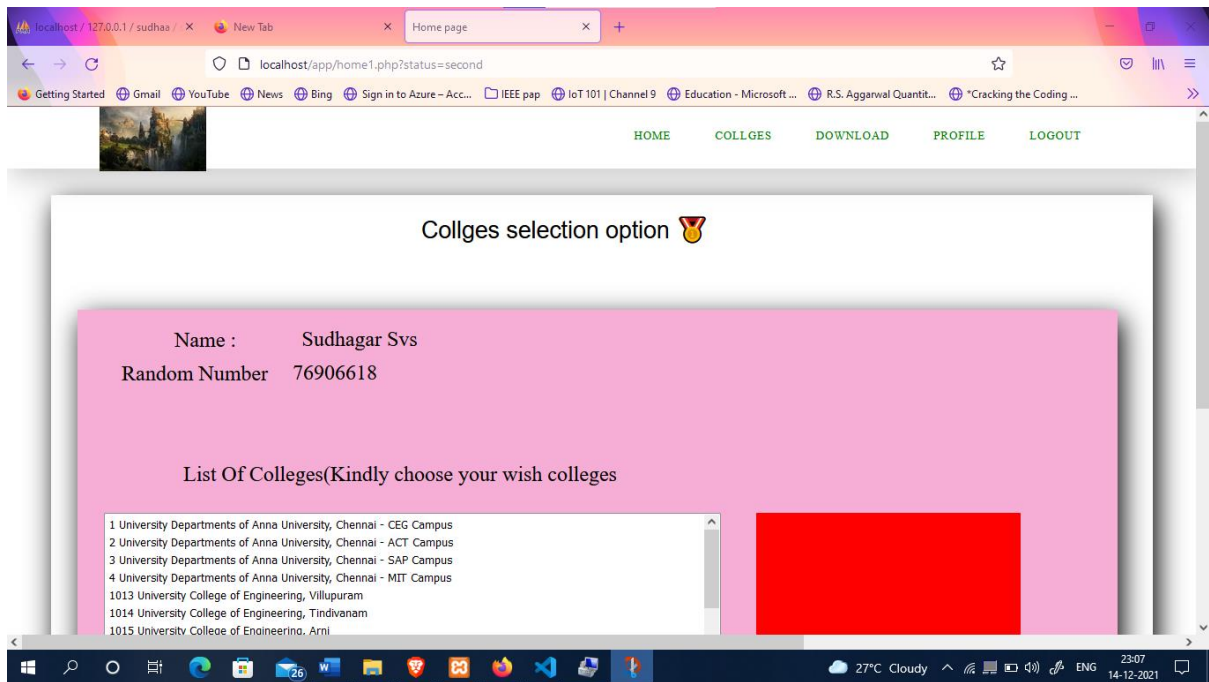

Once click the random number button it will generate number and store it on our database.

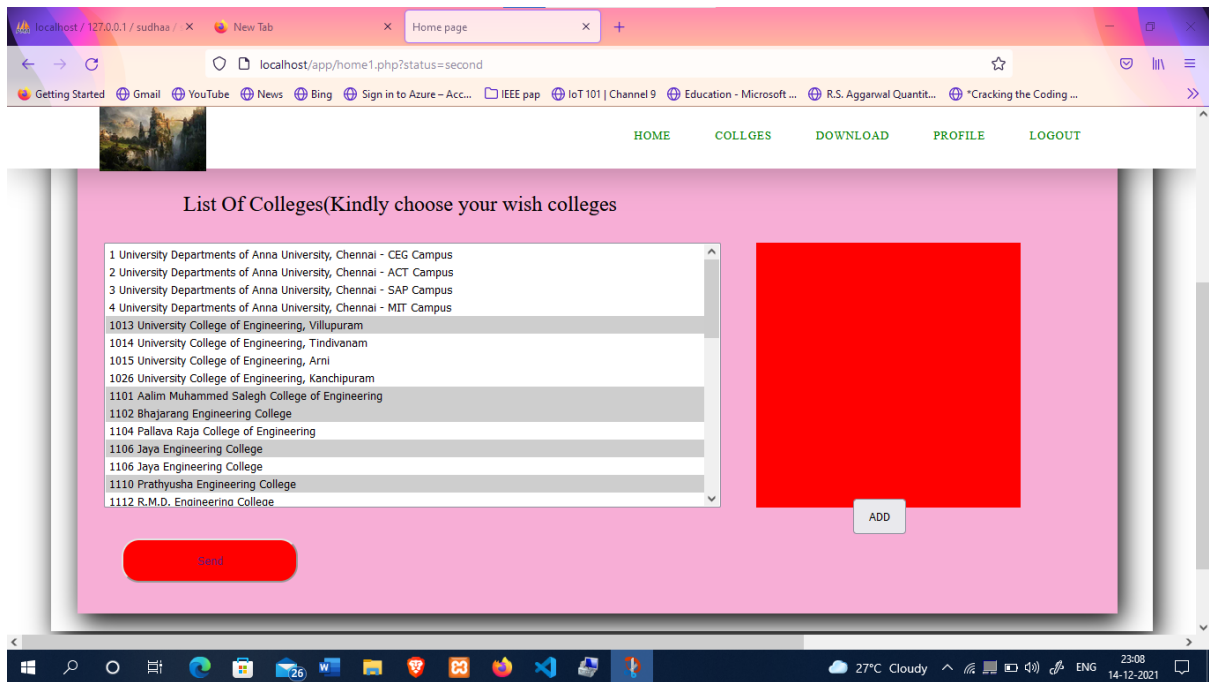

After generation have to move college selection process.

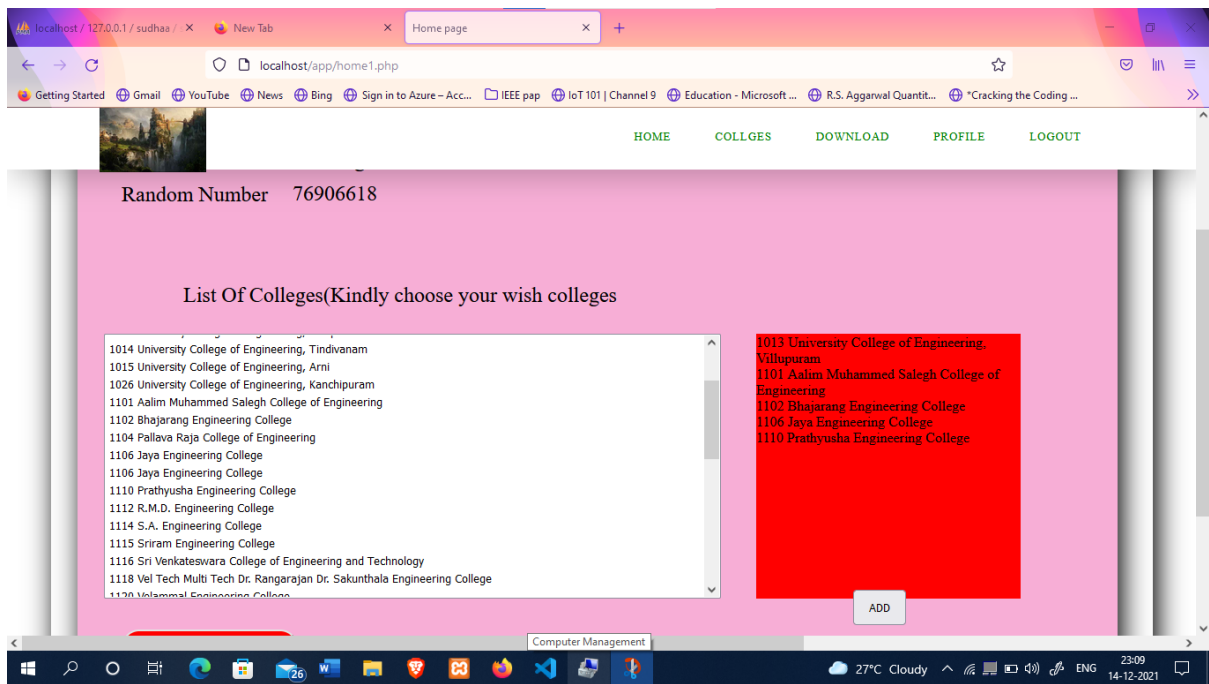

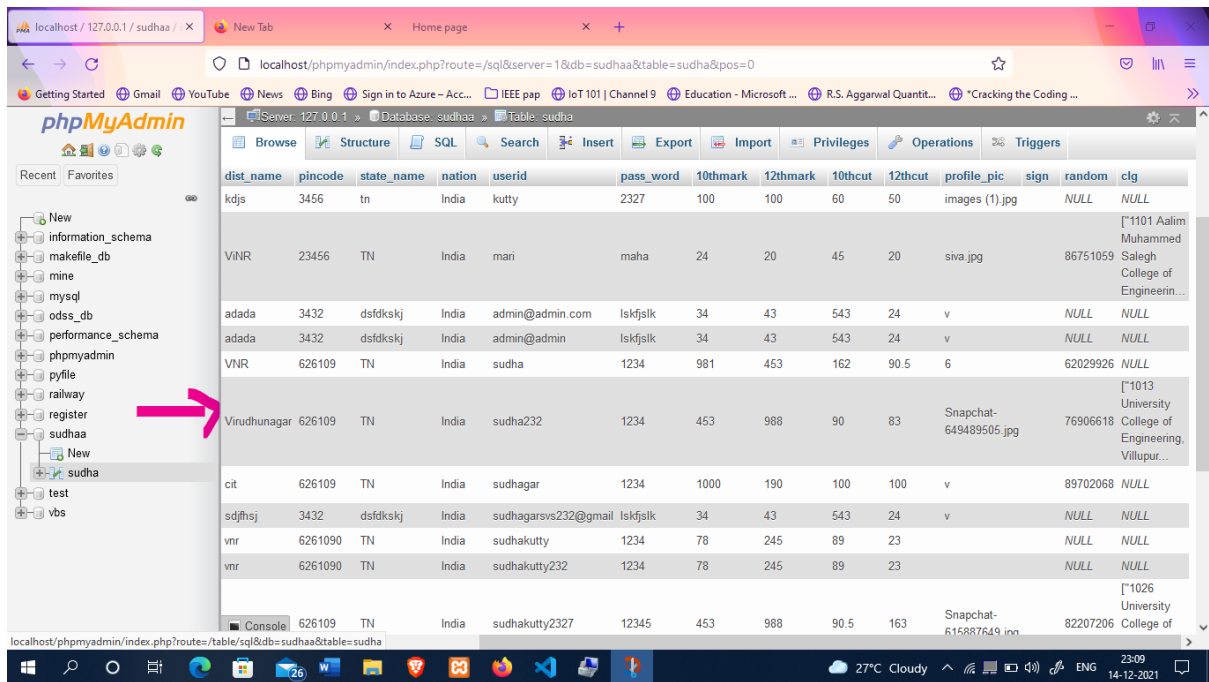

We have to select the clgs,

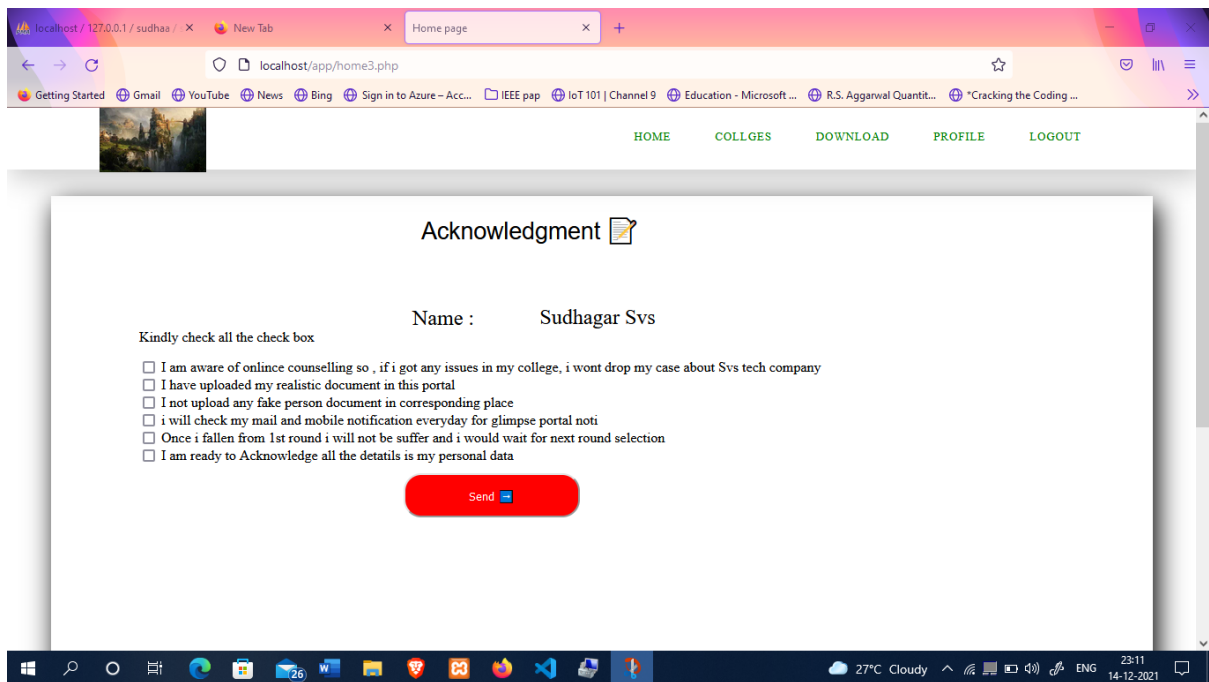

**Selected college would be move to near box for store in on our database.**

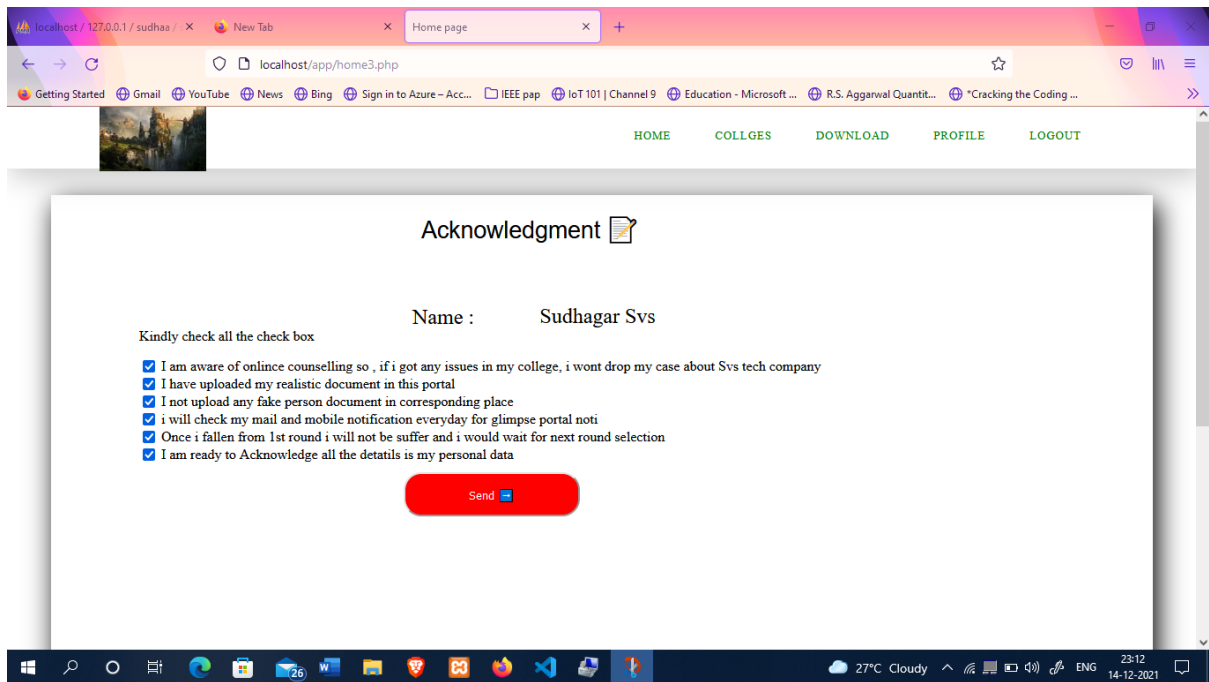

Now all the data's have been stored. Now third page for acknowledgement process.

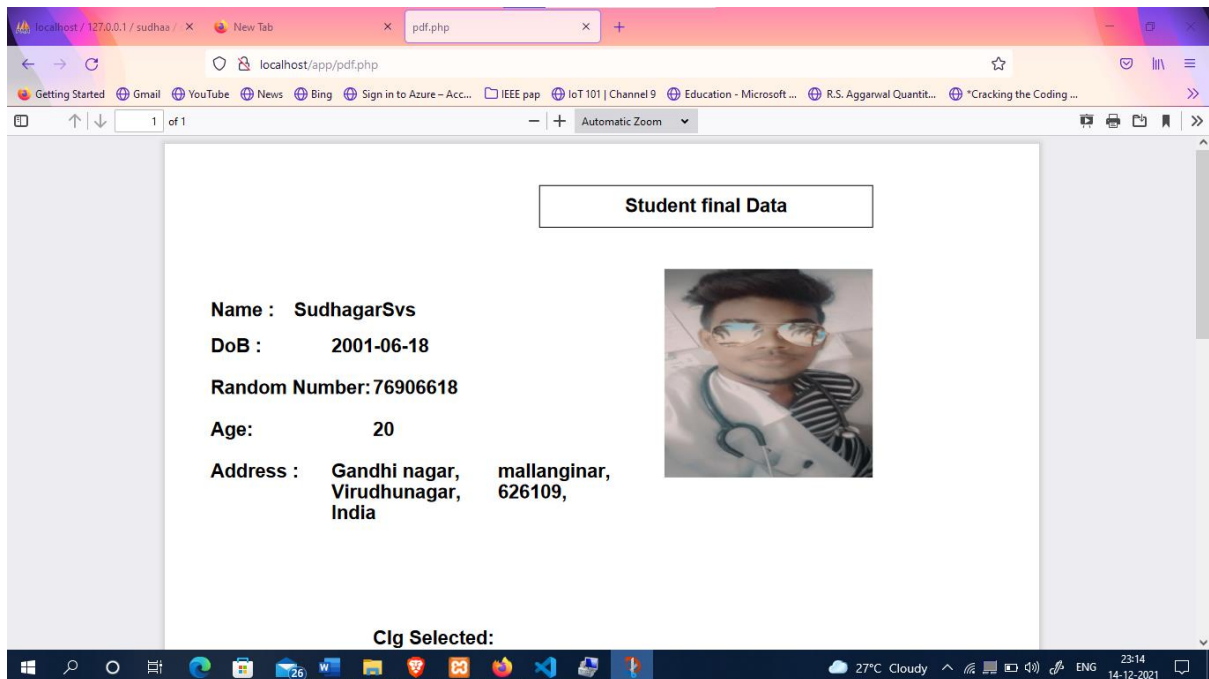

The above image would be next page if we click the button in previous page.

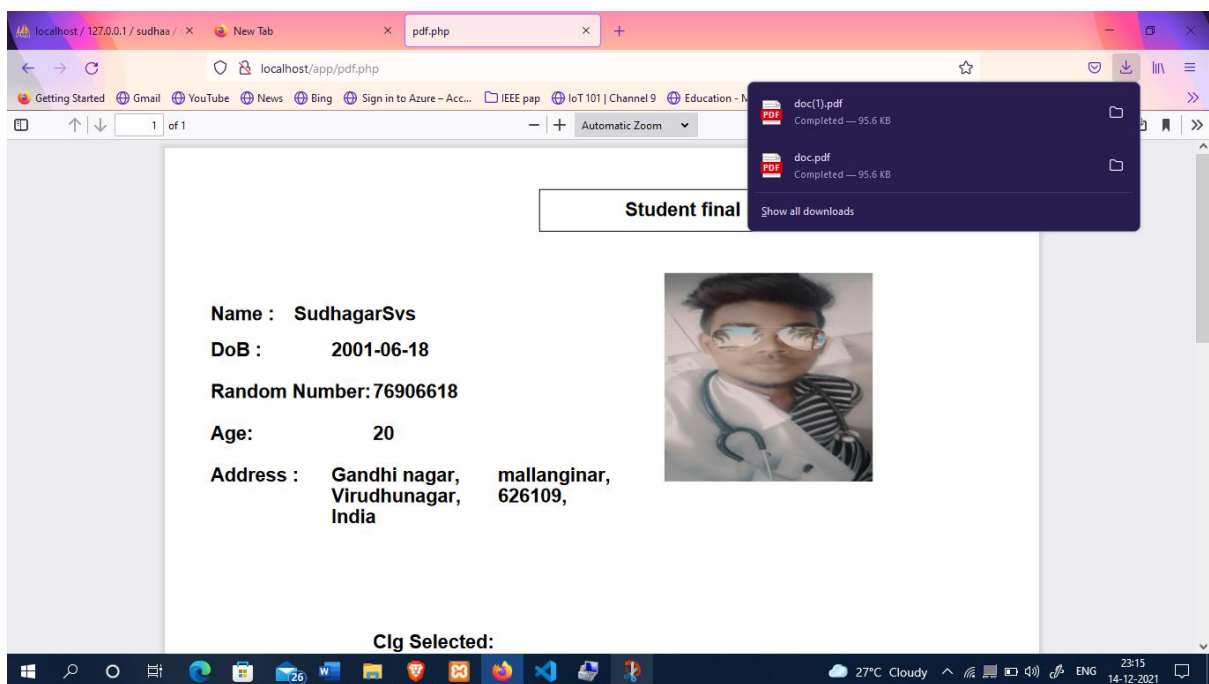

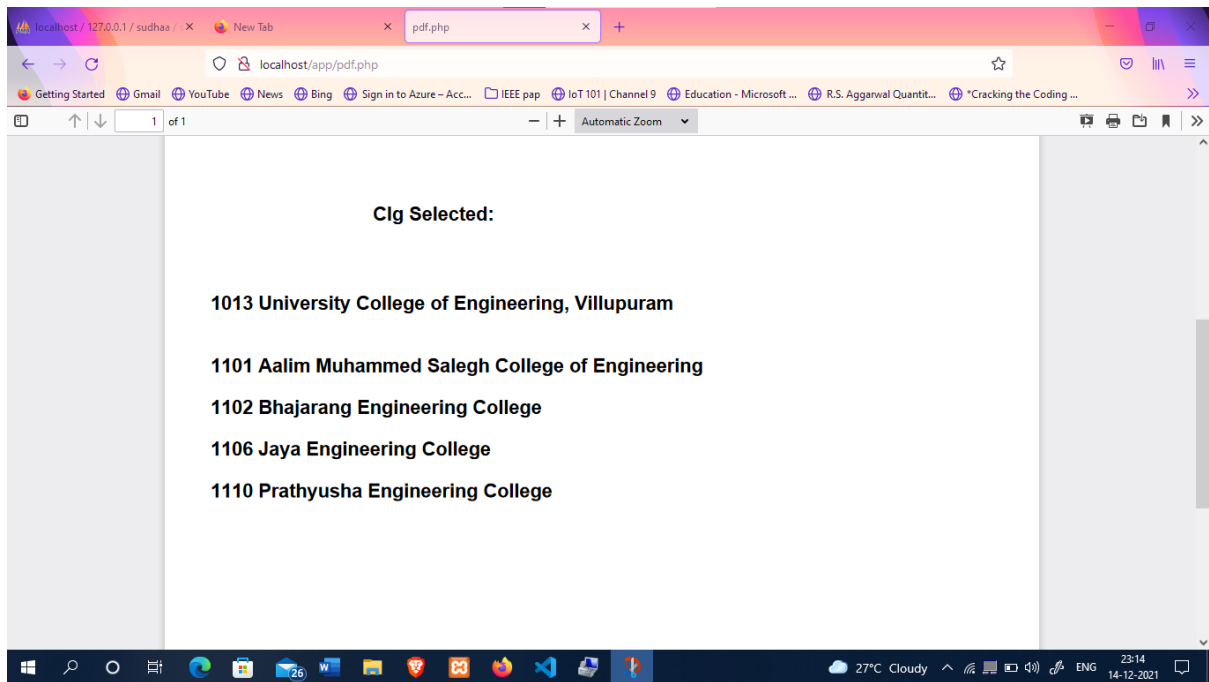

After clicking the box, we have to send to the next page for get whole documentation .

In this documentation part you can download.

By clicking the download option you can get your documents.
